

# DEVANSH SRIVASTAVA

+91-7838006151 | Devansh.srivastava2@gmail.com | New Delhi, India

Software engineer with 2 years of front-end experience building scalable applications in the healthcare domain. Adept at analyzing business workflows, improving usability, and coordinating with stakeholders for product delivery. Seeking to transition into product management to combine technical expertise with user-centered problem-solving.

## Experience

April 2025 – Present

Associate Engineer II | Deloitte USI | Gurugram, Haryana

- Lead front-end enhancements for a large-scale internal portal used by insurance agents to manage enrolment workflows across 17 U.S. states.
- Analyzed new form requirements and regulatory updates, planned UI changes, and collaborated with cross-functional stakeholders to ensure seamless integration.
- Improved workflows through UI refinements and optimization, enhancing efficiency, and reducing redundant navigation.
- Contributed to the redesign of a unified search interface that consolidated multiple pages into a single customizable dashboard.
- Worked closely with senior developers, QA, and data teams to ensure high-quality releases and maintain functional accuracy across modules.

August 2023 – March 2025

Associate Software Engineer | Carelon Global Solutions | Gurugram, Haryana

- Developed responsive UI modules for an internal insurance-enrolment platform used by agents across multiple states.
- Delivered the Compare Feature, allowing side-by-side review of enrolments for quicker validation and fewer manual errors.
- Added three new state configurations during open enrolment, ensuring full compliance and smooth deployment.
- Enhanced code efficiency, maintained test coverage, and supported stable feature rollouts.
- Coordinated with analysts, QA, and backend teams to ensure accuracy and seamless user experience.

July 2021 - December 2021

Full-Stack Intern | Little Leap | Noida, Uttar Pradesh

- Proposed and developed internal tools—including a certificate generator, Excel upload flow, and CRM dashboard—to streamline agent workflows and reduce manual effort.

## Projects & Case studies

- **Tapsy (Mobile App Project)** – React Native, Firebase  
Conceptualized and built a social drinking-game app that syncs with show audio to trigger real-time prompts; defined core features, designed flows in Figma, and shipped the MVP.  
[!\[\]\(569ff5d1aa9137b5defb690d1175fea6\_img.jpg\) View Project](#)
- **Food Delivery App Product Case Study**  
Conducted a product teardown focused on user retention; proposed a loyalty-gamification system to increase repeat orders and long-term engagement.  
[!\[\]\(59bff645cb030955f45f21c74e7ddbd4\_img.jpg\) Read Case Study](#)
- **Dating App Product Case Study**  
Explored user-intent mismatch in dating platforms and designed a concept for intent-based onboarding to improve match quality and reduce churn.  
[!\[\]\(dd83808d77658902b474c9e02c5f52d1\_img.jpg\) Read Case Study](#)

## Skills

- **Technical:** Angular | TypeScript | HTML | CSS | React Native | Firebase | Figma | MySQL | PHP | Jasmine | Karma.
- **Tools & Analytics:** JIRA | Confluence | Bitbucket | GitHub Copilot | Excel | Google Sheets.
- **Product & Strategy (applied through projects):** Product Thinking | Feature Prioritization | Wireframing | PRD Writing | User Research | Product Teardowns | Agile Methodology.

## Education

**Bachelor of Technology in Computer Science**  
Amity University, Noida | 2019 – 2023 | CGPA: 8.2/10

## Certifications

- AWS Academy Graduate: Cloud Foundations – Amazon (Jun 2022)
- Responsive Web Design – freeCodeCamp (Mar 2021)
- Microsoft Specialist: Excel (Office 2016) – Microsoft (May 2018)
